SKILLS

PROGRAMMING LANGUAGES: JavaScript, React, Redux, Jest, HTML / CSS, SQL, SQLite, NodeJS, Express, Knex, Python, C, Jest Testing, Enzyme, React Native, LESS / SASS, MongoDB, Mongoose, Bootstrap

EXPERIENCE

Stealth Geo-Data Startup · Lead Software Engineer

Apr. 2020 to Oct. 2020 · Remote

- Structured and implemented entire application code that includes geo-data operating on PostgreSQL and analytics tools
- Documented numerous tasks and bugs to create a fast collaboration cycle, reducing bugs to enhance the user experience
- Fine-tuned application by using the developer console and speed tests to ensure the app runs efficiently on any device
- Studied various software documentation to implement the micro-services required by my client
- Refined code structure constantly, allowing for cleaner code and more effective solutions to be created

Stealth Fin-Tech Startup · Software Engineer

Sept. 2019 to Feb. 2020 · Remote

- Implemented and designed numerous components including data visualization, filtering tools, and sign up forms
- Participated actively in code reviews, listening to and helping my peers, reducing our bugs and tech debt by over 90%
- Accelerated data retrieval time from over 5 seconds to 2 seconds by testing our API thoroughly
- Became proficient in database design through hands-on practice creating our own MongoDB database

Freelance · Web Developer

Mar. 2019 to Sept. 2019 · Remote

- Built multiple components in React that focused on responsiveness, email subscription management, and contact forms
- Adapted to new platforms of website building such as Cargo.site that allowed for collaboration together with the client
- Gave clear deadlines and addressed issues immediately, resulting in error-free development and fully fulfilling the clients' needs

Visual Communications · Intern

Oct. 2017 to June 2018 · Los Angeles, California

- Increased exposure to film festivals by reaching out to communities through efficient advertising
- Coordinated 2 teams of 4 in the setup process of various venues, leading to a visually stunning experience for clients
- Enhanced company's film festival website by updating and adding 10+ article review posts to the Wordpress website
- Increased profit from film festivals by 5%, creating visually appealing pins by collaborating with the logo designers
- Documented how to create products needed at film festivals to teach my team effectively

EDUCATION

AWS Certified Cloud Practitioner · Aug. 2020 to Aug. 2023

Lambda School, Certificate in Web Development and Computer Science · July 2018 to Mar. 2019

- Learned modern front-end web technologies with a heavy focus on JavaScript as well as JavaScript frameworks
- Experienced Agile development workflow during projects as well as when managing developer teams
- Expert in Git workflows, trying a plethora of different branching strategies

ACTIVITIES

Reading articles on technology to pass the time

- Currently reading articles by Kellen Browning and Ezra Marcus to learn more about tech in today's climate

Learning to conquer crossword puzzles and board games

- With screens surrounding us, crossword puzzles and games like chess scratch that mental itch for true relaxation

Mastering cloud technology through AWS Certifications

- AWS Certifications challenges my learning capabilities by being tested on real world cloud development scenarios
