SUMMARY

Software Engineer looking to always learn and put team-focused and passion driven abilities into a team that shares the same fire inside. With experience working solely in the agile methodology, comfortable in a fast-paced rhythm in any situation and will put in 200% into every task.

SKILLS

PROGRAMMING LANGUAGES: JavaScript, React, Redux, Jest, HTML / CSS, SQL, SQLite, NodeJS, Express, Knex, C, Enzyme, React Native, LESS / SASS, MongoDB, Bootstrap, React Hooks, Figma, UI / UX Design, Github, Object-Oriented Programming, PostgreSQL, MVC, REST APIs, Python 3, Database, Microsoft Office, Google Suite

EXPERIENCE

Stealth Geo-Data Startup · Lead Software Engineer
Apr. 2020 to Oct. 2020 · Remote
- Learned and implemented PostgreSQL as well as CARTO API quickly to implement geo-data features
- Documented numerous tasks and bugs in a proactive manner to quickly generate features and manage tech debt
- Constructed app around MVC model to provide a modern user interface and divide our program into mini parts
- Set up CI / CD pipeline to allow for quicker feedback from client and going live in seconds
- Troubleshot web app to debug SQL database calls and implement search features

Karat (Contract) · Software Engineer
Sept. 2019 to Feb. 2020 · Remote
- Helped build full stuck web app based on MERN and designed pages on both client-facing and admin-facing pages
- Collaborated in code reviews and standups with team members to minimize bugs during deployment process
- Adopted agile methodology to streamline the delivery of our prototypes and receive feedback faster from client
- Interacted heavily with and refined Node.js backend code by creating numerous routes for our frontend to use

Freelance · Web Developer
Mar. 2019 to Sept. 2019 · Remote
- Built multiple components in React that focused on responsive design, email subscription management, and contact forms
- Adapted to new platforms of website building such as Cargo.site that allowed for collaboration together with the client
- Gave clear deadlines and addressed issues immediately, resulting in error-free development and fully fulfilling the clients' needs
- Configured CI / CD pipelines from heroku to interact with Github repos, allowing for quick deployment and testing

Visual Communications · Intern
Oct. 2017 to June 2018 · Los Angeles, California
- Increased exposure to film festivals by reaching out to communities through efficient advertising
- Coordinated 2 teams of 4 in the setup process of various venues, leading to a visually stunning experience for clients
- Enhanced company's film festival website by updating and adding 10+ article review posts to the Wordpress website
- Increased profit from film festivals by 5%, creating visually appealing pins by collaborating with the logo designers
- Documented how to create products needed at film festivals to teach my team effectively

PROJECTS

Song On Spotify
- Handled asynchronous API calls and managed state with React Hooks
- Developed RESTful API using Node.js with Express and MongoDB in order to scale quickly
- Constructed clean and easy frontend to allow for users to quickly interact with Spotify Services faster than the official app
- Followed MVC model to simplify API service usage as well as User Interaction on frontend React code

ProudOf.me
- Architected RESTful API that splits logic to provide a low-latency backend API
- Experimented with NextJS to handle routing and static site generation which leads to faster load times
- Created components and pages using TailwindCSS to simplify styling decisions and keep a uniform design
- Learned GraphQL in order to achieve high performance data retrieval from database

EDUCATION

AWS Certified Cloud Practitioner
Earned: 2020

Lambda School, Certificate in Web Development and Computer Science · July 2018 to Mar. 2019
- Learned modern front-end web technologies with a heavy focus on JavaScript as well as JavaScript frameworks
- Experienced Agile development workflow during projects as well as when managing developer teams
- Expert in Git workflows, trying a plethora of different branching strategies
- Mentored and managed a team of engineers for a short period
